

Certificate of Analysis

Pail Proteose Peptone No 3 10kg

Catalog Number: **212230**

Lot Number: **3206185**

Manufacturing Date: **27 Jun 2023**

Expiration Date: **31 May 2028**

Intended Use: For research use or further manufacturing. Not for diagnostic use or direct administration into humans or animals.

Specifications 01-05 were tested and are acceptable

01. Dehydrated Medium Appearance: Golden tan, free-flowing granules.
02. Solubility: 2% solution soluble in distilled or deionized water.
03. Solution Appearance 2%: Light amber, clear to very slightly opalescent, may have a slight precipitate.
04. Cultural Response: This lot was tested, and the following growth response was obtained:

TEST ORGANISMS	ATCC®	RECOVERY
Staphylococcus aureus	25923	good
Streptococcus pneumoniae	6303	good
Streptococcus pyogenes	19615	good
05. Residual Solvents (CPMP/ICH/283/95): Typical Analysis for Proteose Peptone No. 3 indicates that there is less than 5000 ppm of 1-butanol. No other solvents were detected during analysis.

TEST	SPECIFICATION	RESULT	UNITS
pH at 25°C:	7.0 - 7.6	7.3	-
Nitrogen (Kjeldahl Method)	≥ 10.0	13.4	%
Amino Nitrogen (Modified Sorensen)	2.3 - 4.9	3.6	%
Loss on Drying:	≤ 5	1.9	%
Ash:	≤ 13.0	10.9	%
Bulk Lot Number:	-	3156327	-

Certificate of Analysis

(Continued)

The Lot Number on this certificate is synonymous with the Lot Number shown on the product label.

This product was manufactured and tested for Thermo Fisher Scientific - Advanced Bioprocessing in ISO 13485:2016 registered facilities. In addition, these facilities are registered with the United States Food and Drug Administration (FDA), and are regulated by the FDA's Quality System Regulations (QSRs). This product met Thermo Fisher's stringent quality standards at time of lot release. Any test results reported on this certificate were obtained at time of release. This material is not for human or animal consumption.

Advanced Bioprocessing's Certificates of Analysis (COA) typically contain animal origin information when products are manufactured using materials of animal origin. This information may be contained in the animal source table and/or in one or more of the additional paragraphs found on the COA. Following Quality Control release, the COA is created and published for catalog products at <http://www.thermofisher.com/coasearch>. For each lot of finished product that contains animal origin raw materials, the COA shows the animal origin data from the individual lots of animal origin raw materials used, as provided by the raw material suppliers.

At times, suppliers notify Thermo Fisher of new and/or additional information they have received from their raw material suppliers that modifies the animal origin information for lots previously provided to Thermo Fisher. Advanced Bioprocessing will notify customers of record for any changes to the COA.
