

NoLimits 750 bp DNA Fragment

Catalog Number SM1471

Pub. No. MAN0013065 Rev. B.00

WARNING! Read the Safety Data Sheets (SDSs) and follow the handling instructions. Wear appropriate protective eyewear, clothing, and gloves. Safety Data Sheets (SDSs) are available from thermofisher.com/support.

Contents and storage

Contents	Amount	Storage
NoLimits 750 bp DNA Fragment	10 µg, 0.5 µg/µL	-25 °C to -15 °C

Description

Thermo Scientific™ NoLimits™ DNA Fragment is a chromatography-purified, exceptionally pure individual DNA fragment.

It is produced using specifically designed plasmid DNA purified by a patented technology. Plasmid DNA is digested with restriction endonucleases and the individual DNA fragment is chromatography-purified from the digestion mixture. The NoLimits™ DNA Fragment is suitable for gel and capillary electrophoresis, DNA quantification, HPLC analysis and other applications that require high purity and custom composition of DNA standards.

Convenient concentration of NoLimits™ DNA Fragments allows mixing of several individual fragments to produce a custom ladder of required range and composition.

Storage Buffer (TE buffer)

10 mM Tris-HCl (pH 7.6), 1 mM EDTA.

Important note: For NoLimits fragment dilution use TE buffer (10 mM Tris-HCl (pH 7.6), 1 mM EDTA) to avoid denaturation of the DNA fragment.
