

# Certificate of Analysis

## Yeast tRNA

Product No. 15401029, 11518736

Lot No. 2783613

Date of Manufacture 09-Aug-2024

---

### Endonuclease

Specification: No conversion of pUC19 DNA to Form II or Form III after incubation with 100 micrograms yeast tRNA at 37°C for six hours.

Result: Meets specification.

### Exonuclease

Specification: With 1 pmol of the relevant substrate the following criteria must be obtained after a 1 hour incubation: 3' ss slope, 3'ds slope, 5' ds slope % of termini released: less than or equal to 0.3%.

Note: If the R<sup>2</sup> value of the linear regression line is <0.6, then the slope is not reliable. Therefore, the data does not indicate detectable exonuclease activity. If the R<sup>2</sup> value of the linear regression line is >0.6, then the slope is reliable and indicates the absence of exonuclease activity.

Result: Meets specification.

### RNase

Specification: Acrylamide/urea gel electrophoresis reveals no observable smearing of CAT Control RNA when incubated for 1 hour at 37°C with 5 micrograms yeast tRNA as compared to CAT Control RNA incubated alone.

Result: Meets specification.
