

# Certificate of Analysis

LB Agar, powder (Lennox L agar)

Product No. 22700025, 11518916

Lot No. 2408AL

Date of Manufacture 06-Aug-2024

---

## DCM Appearance

Specification: homogeneous, free flowing, beige to light beige

Result: Meets specification.

## PPM Appearance

Specification: Trace to light haze, light amber

Result: Meets specification.

## pH of 3.2% solution at 25° C

Specification: 7.0 +/- 0.2

Result: Meets specification.

## Microorganism Growth

Specification: *Escherichia coli* ATCC 23724, good to excellent growth at incubation temp of 35° C

Result: Meets specification.

Specification: *Escherichia coli* ATCC 33694, fair to very good growth at incubation temp of 35° C

Result: Meets specification.

Specification: *Escherichia coli* ATCC 33849, fair to good growth at incubation temp of 35° C

Result: Meets specification.

Specification: *Escherichia coli* ATCC 39403, good to excellent growth at incubation temp of 35° C

Result: Meets specification.

Specification: *Escherichia coli* ATCC 47014, good to excellent growth at incubation temp of 35° C

Result: Meets specification.

Specification: *Escherichia coli* ATCC 53868, good to excellent growth at incubation temp of 35° C

Result: Meets specification.
