Product Specific Information

MA3-929 detects sodium/potassium ATPase alpha 1 in sheep, canine, rat, mouse, human and porcine tissues. This antibody does not detect the alpha 1 isoform in Xenopus and chicken. MA3-929 does not detect the alpha 2 or alpha 3 isoform in rat.

MA3-929 has been successfully used in Western blot, immunofluorescence, immunocytochemistry, flow cytometry, and immunohistochemistry procedures. By Western blot, this antibody detects an ~110 kDa protein representing alpha 1 sodium/potassium ATPase from canine kidney extract. Immunohistochemical staining of sodium/potassium ATPase alpha 1 with MA3-929 yields a pattern consistent with plasma membrane localization. The MA3-929 antigen is sheep kidney alpha 1 sodium/potassium ATPase. This antibody recognizes an epitope between amino acid residues 496-506 of lamb kidney sodium/potassium ATPase.
