Product Specific Information

PA1-28870 has been successfully used in ELISA, immunohistochemistry (frozen tissue), immunoprecipitation, and Western blot applications. NOTE: The preparation of a specific antibody to Collagen III's uninterrupted "Glycine-X-Y" triplet repeat requires a non-denatured epitope format. Consequently, it is recommended to use this antibody in a Western blot using non-denaturing or "native" conditions. Store as concentrated solution. Centrifuge briefly prior to opening vial.
