A satisfactory result is represented by recovery of positive strains equal to or greater than 70% of the control medium from an inoculum of 10-100 colony-forming units (cfu). For positive test strains inoculated using diminishing sweep technique, a satisfactory result is represented by growth in accordance with the specification from an inoculum of 1E+04 to 1E+06 cfu. Negative strains are inhibited from an inoculum of 1E+04 to 1E+06 cfu.
